

An index of the files for the L^AT_EX seminar

- `index.tex` — this document
- `simplest.tex` — the “simplest” L^AT_EX document, with an introduction to L^AT_EX
- `basicmath.tex` — a quick introduction to typing math in L^AT_EX
- `textformat.tex` — a table of text formatting commands in L^AT_EX (emphasis, bold, etc.)
- `articletemplate.tex` — a very generic template for a L^AT_EXed article
- `advancedmath.tex` — useful information on how to do matrices and align equations in math
- `advancedmathexamples.tex` — a sheet of examples with more advanced math
- `macros.tex` — how to make your own macros to help write your L^AT_EX documents
- `macrosexamples.tex` — examples of writing macros
- `tables.tex` — how to make tables to organize data
- `tablesexamples.tex` — examples of tables
- `references.tex` — a partial list of references on T_EX and L^AT_EX
